EXPERIENCE PRODUCTIVITY

Improve Industrial Processes - High Productivity

With over 15 years of industrial engineering experience spanned globally, we are able to evaluate and propose new, better and more efficient industrial systems to improve productivity and efficiency. We have provided process improvement solutions that have increased clients productivity by as much as 30% and reduced downtime by 80%.

Save Energy - Reduce Operating Costs

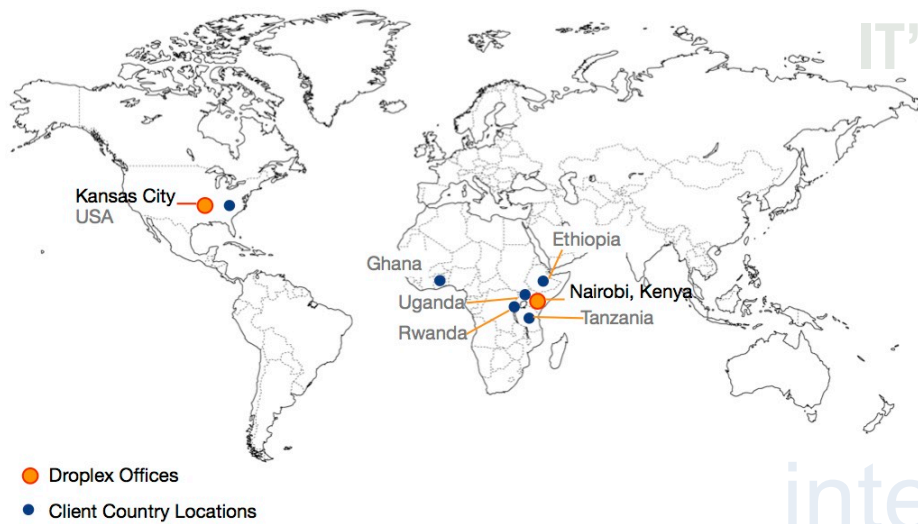

Our energy solutions start with an energy audit and then proposals of requirements that include process changes as well as investment on equipment. Short term solutions include proposing low investment changes and use of better and low energy consuming production methods. Long term solutions may involve some capital investments but delivery very short payback periods.

Reliable Equipment - Reduce Downtime

Improving production methods involves investment in reliable equipment. In line with improving productivity, efficiency and reducing downtime, we only supply equipment that delivers reliability and meets the highest industry standards. In short, we stand fully behind the brands we deliver to you. This is evidenced by the long warranty periods you find with most of our equipment.

Safe Workplace - Protect People & Assets

With experience managing a 10 year zero reportable injury facilities, we know what it takes to provide a safe work place and as such we can provide specialized safety solutions almost unmatched by any other company. Our safety solutions go beyond providing basic PPE. We provide industry specific safety solutions that will protect both protect both employees and the property.

IT'S WHO WE ARE

integrity

The Business:

A privately owned company that provides value industrial engineering services and solutions that increase productivity to manufacturing firms in North America and in Africa.

Our Focus:

1. To get our customers to experience productivity by providing solutions to their industrial challenges
2. Provide them with the most effective and reliable systems to do the job
3. Save them energy costs and
4. Improve on their overall safety.

Engineering Services: Our Industrial Engineering services can be grouped into the following;

- Lubrication Systems & Solutions
- Process Instrumentation and Measurements
- Energy Saving Solutions
- Specialized Industrial Safety

Industries: Food & Beverage, Sugar, Mining, Cement, Sugar and Oil & Gas industries.

Value Partnerships - We have built and continue building strong partnerships with great companies that help us provide great solutions. These partners include;

- Lincoln Lubrication - Automated Lubrication
- Quadrant Engineering - Material Flow Solutions
- Extec - Mining Systems
- JBL Co. - Mining Sampling Systems
- SAVA Tech - Specialty Conveyor Belts
- System Seals - Specialty Seals
- The Protectowire Co. - Heat & Fire Detection
- PAS International - Alcohol Detection
- RKI Instruments - Gas Monitoring
- Bever Innovations - LED Lighting Systems
- Armadillo LED - LED Lighting Systems
- Magnetek - Crane Drive Systems
- Rexnord - Gear Drives, Bearings, Chains Couplings, Bucket Elevators

value

Our Vision: To be the most committed company on improving our customer's business by providing unmatched value engineering productivity services and solutions.

The Mission: To continuously find solutions to our customer's industrial engineering challenges that affect their productivity. With this solutions, our customers will experience productivity in their operations and grow. We will achieve this and succeed by providing our solutions and services with **integrity, value and dedication.**

Our Strategy - Meeting our business objectives will be a continuous process that will be achieved by;

- ★ Upholding integrity in all parts of our business
- ★ Expanding our scope of value engineering solutions
- ★ Believing in our employees for the growth of the company
- ★ Thinking action 24/7

dedication

Quality Statement - Droplex™ will apply quality in its operational procedures, processes, products and services to our customers. We will constantly improve through continuous process improvement based on our experiences while conducting our business. Our experience in Six Sigma and Lean Manufacturing quality processes will enable us to become a better company year after year.

Community Participation & Mentorship - We are involved in the communities we operate in by providing educational scholarships for needy deserving students as well as work internships at our offices. We also provide mentorship to young entrepreneurs. We believe that these programs are part of what will continue to define us as a community conscious company.
